DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3, 4, 9-11, 16, 18, 19, and 24 are rejected under 35 U.S.C. 102(b) as being anticipated by Sekiguchi et al (5,715,008) for the same reasons as set forth in Section 8 of the last office action, dated 6/7/10.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 5-8, 12-15, and 20-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sekiguchi et al in view of Matsushiro et al (6,201,612) for the same reasons as set forth in Section 10 of the last office action, dated 6/7/10.

Response to Arguments

5. Applicant's arguments filed 8/17/10 have been fully considered but they are not persuasive. Applicant asserts on pages 6-7 of the Remarks that Sekiguchi et al fails to disclose a variable deblocking filter. However, as stated in the last office action, Figure 18 of Sekiguchi et al illustrates the concept of the error concealment stage varies the strength of the deblocking

performed by the deblocking filter in accordance with an error concealment technique (e.g. field/frame mode, filter instruction flag 17).

6. Applicant also asserts on page 8 of the Remarks that SW1 and SW2 of Sekiguchi et al have no bearing on offset values. However, these switches varies the error concealment stages for the deblocking filter 130, thus meeting the claimed invention in its broadest reasonable sense, consistent with applicant's own disclosure.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
